

ChoHyeon Kim

Burnaby, BC, Canada | chohyeonellykim@gmail.com | linkedin.com/in/chohyeon-k-586614230 | github.com/chohyeonkim

Professional Summary

Software Engineer with strong engineering foundations (3+ years total engineering experience), passionate about backend infrastructure, cloud networking, and distributed systems

Technical Skills

- Languages:** Python, Golang, Java, C#, C++, JavaScript, TypeScript, SQL, Bash
Frameworks & Libraries: Node.js, Express, React, .NET, FastAPI
Databases & Cloud: PostgreSQL, MongoDB, Microsoft SQL, Azure Cloud
Tools & CI/CD: Git, GitHub Actions, Jenkins, REST APIs, Linux, Docker

Work Experience

Software Developer Intern, SAP, Vancouver, Canada	May 2026 – Present
Automated platform infrastructure management tasks, including outdated version removal and resource cleanup, using GitHub Actions and Jenkins to optimize workflows.	
Software Developer in Test Intern, Global Relay, Vancouver, Canada	Sep 2025 – Apr 2026
- Information Archiving Department – Enrichment Team. - Developed end-to-end (E2E) tests using Java and Selenium WebDriver for UI automation. - Implemented TypeScript-based API test automation to validate API services. - Contributed to migrating the UI automation framework to WebdriverIO (TypeScript) with Cucumber. - Developed BDD-based E2E test scripts, improving test readability and cross-team collaboration. - Collaborated closely with developers and TPMs to establish test plans and define expected system behaviors.	
Software Development Engineer in Test Intern, NETGEAR, Richmond, Canada	Sep 2023 – Apr 2024
- Router Software Team - contributed to embedded system testing and test automation for networking products using Python and Bash. - Automated Test Execution, Design and implement automated tests, ensuring software quality. - Developed Python-based test automation frameworks on Linux Systems, utilizing Playwright for Web GUI test. - Gained experience in networking, with a focus on debugging and troubleshooting. - Contributed to the testbench infrastructure R/D, improved testing efficiency and scalability of test environments. - Worked with DevOps on GitHub Actions CI/CD pipelines and actively participated in code reviews, following Agile Scrum and Kanban processes.	
Assistant Researcher, KETI, South Korea	Jun 2021 – Dec 2021
Analyzed electrical test results to identify and resolve failure mechanisms in power semiconductors.	
Junior Product Development Engineer, STEMCO, South Korea	Mar 2018 – Nov 2019
Managed product development processes and quality control within the Chip-on-Film (COF) engineering team.	

Technical Projects

Piazza AI Plugin Python, FastAPI, PostgreSQL (Supabase), React	Sep 2025 – Apr 2026
Architected a FastAPI-based AI backend in Python, implementing RAG data pipelines with text chunking and embedding generation for real-time post summarization.	
Raft Consensus Algorithm Implementation Golang	Feb 2025 – Apr 2025
Implemented the Raft consensus protocol in Go using goroutines for randomized leader elections, RPC heartbeats, and AppendEntries log replication to guarantee state-machine safety.	
Digital Asset Management System C#, .NET, MSSQL, Azure, React, Next.js	Jan 2025 – Apr 2025
- Designed and implemented a Digital Asset Management (DAM) system at Associated Engineering. - Built C# .NET REST APIs for handling image uploads, metadata management, and automated archiving.	

Education

University of British Columbia Bachelor of Computer Science (BCS) – Cumulative Average: 85%	Vancouver, Canada Graduated
Kookmin University B.Eng. in Advanced Materials Engineering (Semiconductor)	Seoul, South Korea Graduated
