

ChoHyeon Kim

Burnaby, BC, Canada | chohyeonellykim@gmail.com | linkedin.com/in/chohyeon-k-586614230 | github.com/chohyeonkim

Professional Summary

Software Engineer with 3+ years of engineering experience in the semiconductor industry and 2 years of software development internship experience. Interested in backend development, infrastructure, networking, distributed systems.

Technical Skills

Languages: Python, Go, Java, C#, C++, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: Node.js, Express, React, .NET, FastAPI

Databases & Cloud: PostgreSQL, MongoDB, Microsoft SQL, Azure, AWS

Tools & Infrastructure: Git, GitHub Actions, Jenkins, REST APIs, Linux, Docker

Work Experience

Software Developer Intern, SAP, Vancouver, Canada

May 2026 – Present

- Business Data Cloud – Cloud and Application Infrastructure Team for SAP Analytics Cloud.
- Built an AI-assisted workflow using MCP and AI skills to investigate blockers across Jira, email, GitHub, internal wikis, and portals, synthesize findings, and generate actionable email drafts for teams to accelerate outdated platform version removal.
- Automated version removal and resource cleanup workflows using GitHub Actions and Jenkins, accelerating retirement of versions costing approximately €10K per month to maintain while freeing infrastructure resources for upcoming releases.
- Developing a reusable AI skill and Python automation workflow to identify and remove 7+ years of obsolete migration-related code using repository scan data, with automated pull request creation across owning teams.
- Defined a standardized cleanup process for future migration waves, establishing business rules for code eligibility and ownership to prevent obsolete migration code from accumulating over time.

Software Developer in Test Intern, Global Relay, Vancouver, Canada

Sep 2025 – Apr 2026

- Information Archiving Department – Enrichment Team.
- Developed TypeScript-based API test automation to validate API services and expected system behaviors.
- Developed Java/Selenium E2E tests and contributed to migrating the UI automation framework to TypeScript, WebdriverIO, and Cucumber for BDD-based testing.

Software Development Engineer in Test Intern, NETGEAR, Richmond, Canada

Sep 2023 – Apr 2024

- Router Software Team – Embedded software for networking products.
- Developed Python and Bash test automation for C++-based embedded router software, reading and analyzing C++ source code to support debugging and troubleshooting.
- Built Python-based test automation frameworks on Linux, including Playwright-based Web GUI testing.
- Debugged and troubleshooted networking issues across embedded router software and test environments.
- Contributed to a network-connected testbench infrastructure that enabled remote hardware testing over SSH, reducing the need for physical access to networking devices.

Assistant Researcher, KETI, South Korea

Jun 2021 – Dec 2021

- Analyzed electrical test results to identify and resolve failure mechanisms in power semiconductors.

Junior Product Development Engineer, STEMCO, South Korea

Mar 2018 – Nov 2019

- Contributed to the chip-on-film team and managed product development.

Technical Projects

Piazza AI Plugin | Python, FastAPI, PostgreSQL (Supabase), React

Sep 2025 – Apr 2026

- Architected a FastAPI-based AI backend in Python, implementing RAG data pipelines with text chunking and embedding generation for LLM-powered real-time post summarization.

Raft Consensus Algorithm Implementation | Golang

Feb 2025 – Apr 2025

- Implemented the Raft consensus protocol in Go using goroutines for randomized leader elections, RPC heartbeats, and AppendEntries log replication to guarantee state-machine safety.

Digital Asset Management System | C#, .NET, MSSQL, Azure, React, Next.js

Jan 2025 – Apr 2025

- Designed and implemented a Digital Asset Management (DAM) system at Associated Engineering.
- Built C# .NET REST APIs for handling image uploads, metadata management, and automated archiving.

Education

University of British Columbia Bachelor of Computer Science (BCS) – Cumulative Average: 85%

Vancouver, Canada Nov 2026

Kookmin University B.Eng. in Advanced Materials Engineering (Semiconductor)

Seoul, South Korea Graduated
