

ChoHyeon Kim

Burnaby, BC, Canada | chohyeonellykim@gmail.com | linkedin.com/in/chohyeon-k-586614230 | github.com/chohyeonkim

Professional Summary

A software engineer with 3+ years of professional engineering experience, specializing in backend infrastructure, cloud networking, and distributed systems.

Technical Skills

Languages: Python, Golang, Java, C#, C++, JavaScript, TypeScript, SQL, Bash
Frameworks & Libraries: Node.js, Express, React, .NET, FastAPI
Databases & Cloud: PostgreSQL, MongoDB, Microsoft SQL, Azure Cloud, Docker
Tools & CI/CD: Git, GitHub Actions, Jenkins, REST APIs, Linux

Work Experience

- Software Developer Intern, SAP, Vancouver, Canada**

May 2026 – Present

 - Automated platform infrastructure management tasks, including outdated version removal and resource cleanup, using GitHub Actions and Jenkins to optimize workflows.
- Software Developer in Test Intern, Global Relay, Vancouver, Canada**

Sep 2025 – Apr 2026

 - Developed end-to-end (E2E) UI automation test suites using Java and Selenium WebDriver.
 - Implemented TypeScript-based API test automation to validate API services efficiently.
 - Contributed to migrating the UI automation framework to WebdriverIO (TypeScript) with Cucumber BDD.
 - Developed BDD-based E2E test scripts, significantly improving test readability and cross-team collaboration.
 - Collaborated closely with developers and TPMs to establish test plans and define expected system behaviors.
- Software Development Engineer in Test Intern, NETGEAR, Richmond, Canada**

Sep 2023 – Apr 2024

 - Contributed to embedded system testing and automated test execution for networking products using Python and Bash.
 - Designed and implemented Python-based test automation frameworks on Linux systems, utilizing Playwright for Web GUI testing.
 - Debugged and troubleshooted networking infrastructure and contributed to testbench R&D to enhance scalability.
 - Worked with DevOps teams on GitHub Actions CI/CD pipelines within Agile Scrum and Kanban frameworks.
- Software Developer (Volunteer), UBC Launch Pad, Vancouver, Canada**

Sep 2025 – Apr 2026

 - Developed a Chrome browser extension integrating AI-powered search and summarization features for Piazza.
- Assistant Researcher, KETI, South Korea**

Jun 2021 – Dec 2021

 - Analyzed electrical test results to identify and resolve failure mechanisms in power semiconductors.
- Junior Product Development Engineer, STEMCO, South Korea**

Mar 2018 – Nov 2019

 - Managed product development processes and quality control within the Chip-on-Film (COF) engineering team.

Technical Projects

- Piazza AI Plugin | Python, FastAPI, PostgreSQL (Supabase), React**

Sep 2025 – Apr 2026

 - Architected a FastAPI-based AI backend in Python, implementing RAG data pipelines with text chunking and embedding generation for real-time post summarization.
- Raft Consensus Algorithm Implementation | Golang**

Feb 2025 – Apr 2025

 - Implemented the Raft consensus protocol in Go using goroutines for randomized leader elections, RPC heartbeats, and AppendEntries log replication to guarantee state-machine safety.
- Digital Asset Management System | C#, .NET, MSSQL, Azure, React, Next.js**

Jan 2025 – Apr 2025

 - Designed and implemented a Digital Asset Management (DAM) system at Associated Engineering.
 - Built C# .NET REST APIs for handling image uploads, metadata management, and automated archiving.

Education

- University of British Columbia**

Vancouver, Canada

Bachelor of Computer Science (BCS) – Cumulative Average: 85%

Graduated
- Kookmin University**

Seoul, South Korea

B.Eng. in Advanced Materials Engineering (Semiconductor)

Graduated
